

Simple Bible Study Methods

A One Day Leader Training Seminar

Brad gave his life to Christ in 1977 and soon grew to hunger for maturity in Christ. He discovered that many Christians did not have basic Bible knowledge, and were not trained how to read the Bible for themselves. His desire to teach believers and support the world's pastors has led him to 25 domestic and international mission trips and a teaching/discipleship ministry in which he uses multi-media, object lessons, and stories of what God has done in his life to train pastors and laymen these basic Bible study techniques and discipleship concepts.

1- The heart and life of a man who loves God.

This short study asks the teacher to become “a man after God’s own heart”; one who examines his motives and purity of heart before teaching the Word of God.

2- Why study the Bible rather than other religious books?

In this lesson, we ask and answer the question, “Why the Bible?” With all the other religious books available to us today, why do we believe in the supremacy of the Bible?

3- Why study and teach the basics?

In a world full of skeptics, doubters, and ill-prepared Christians, this study helps equip the follower of Christ defend the faith in the market place of ideas.

4- The purpose is to make disciples who will make disciples.

This final study challenges and equips the believer to fulfill the Great Commission; to become a maker of disciple makers as Moses was with Joshua, Jesus with the disciples, and Paul was with Timothy.
